SolarPower Europe has published its new market intelligence report, the European Market Outlook for Battery Storage 2024-2028. The report illustrates the state of play of battery storage across Europe, with updated figures on annual and total installed capacities up to 2023 and a forecast of future installations under three scenarios until 2028.

In the power sector, battery storage is the fastest growing clean energy technology on the market. The versatile nature of batteries means they can serve utility-scale projects, behind-the-meter storage for households and businesses and provide access to electricity in decentralised solutions like mini-grids and solar home systems.

It promises to provide the load-smoothing and grid-balancing capabilities needed in an industry accommodating increasing penetration of distributed energy and renewable resources. Read about the key capabilities of AutoGrid Energy Storage Management System (AutoGrid ESMS(TM)), and how you can get the most value out of energy storage ...
