

What is Contel smart energy?

Contel Smart Energy, part of the Contel Technologies Group, leverages a robust combination of industry-leading toolset for supervisory control and data acquisition (SCADA), artificial intelligence and advanced optimization to make Microgrid operations and EV Fleet management smarter, better, and more efficient.

What is Contel smart energy & MMTS?

Contel SMART ENERGY - develops software systems that enable operators of local electricity networks to significantly save on their energy expenses with the help of proper utilization of green energy. MMTS - packaging solutions, marking, palletizing.

How much power does Contel provide?

In addition, Contel provides central electricity cabinets with an output of 3200 amperes based on Rittal's system and the ABB system - which includes a replacement and synchronization system for a generator.

Who is Contel ICS?

Contel ICS - provides engineering and integration services with the largest team of control and software engineers in Israel in a wide range of industries. Contel Electromechanics & control provides planning and execution services of low and high voltage systems and panels, smart MCC panels according to customer requirements.

Does Contel provide a MCC panel?

In addition, Contel provides an MCC panel with two inlets of 1250 amperes, automatic replacement, and smart starters with an Ethernet/IP communication. Project description: Strauss factories manage their manufacturing and operation processes via Trunovate's systems. These systems include integrative interfacing with the organization's SAP system.

What is the project description of Contel etgal?

Project: Equipment, electricity and monitoring systems for the new power station "Etgal" in Ashdod. Project description: A variety of technical solutions provided by Contel. These solutions include a process monitoring system of Rockwell Automation, PlantPax series, and controllers with an SIL3 security classification.

Contel Smart Energy supplies a big data and analytical tool - with the ability to predict and operate smartly all microgrid assets - while taking into account the current technology provider, storage lifecycle, utility prices and local consumption.

Contel Smart Energy, a part of Contel Technologies Group, provides monitoring and control systems for solar electricity generation in Israel and abroad. The company offers its clients output control and management

methods for solar generation systems, including smart optimization and effective use of storage systems, with modular software ...

Contel SMART ENERGY - develops software systems that enable operators of local electricity networks to significantly save on their energy expenses with the help of proper utilization of green energy. MMTS - packaging solutions, marking, palletizing.

Contel Smart Energy, part of the Contel Technologies Group, leverages a robust combination of industry-leading toolset for supervisory control and data acquisition (SCADA), artificial intelligence and advanced optimization to make Microgrid operations and EV Fleet management smarter, better, and more efficient.

The solution required for optimal energy generation and supply is a software-based smart decision mechanism that interfaces in real time with all related factors, including the operational systems of the solar field, the management ...

The variety of energy sources and the reduction of dependence on depletable energy reserves are necessary requirements in the new global economy. Environmental considerations, rising energy prices and the high growth rates of the global economy have raised awareness and the importance of renewable energy sources.

Continuously seeks out innovative technologies and approaches to drive improvements and achieve strategic goals in the fast-evolving field of automated control systems. &#183; Experience: Contel Smart Energy &#183; Education: Far Eastern State Transport University &#183; Location: Israel &#183; 427 connections on LinkedIn.

SO WHAT DO I DO ?& lt;br& gt;Acting as highly qualified service engineer and the field of electrical drive (VFD VSD Industrial Communication)& lt;br& gt;Defining `the correct solution to customers based upon their technical requirements& lt;br& gt;& lt;br& gt;HOW I DO IT ? . & lt;br& gt;Field commissioning, customer training & workshops, general information days, exhibitions, ...
