PRODUCE GREEN, CLEAN AND CHEAPER ENERGY. Cheaper than grid up to 30%. Zero investment. Environmental commitments and responsibilities. Operation and maintenance services performed by experts. Guaranteed efficiency and performance. Reduced CO2 emissions into the environment. PREV. NEXT.

Renewable energy in the Cook Islands is primarily provided by solar energy and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce greenhouse gas emissions, [1] with an initial goal of reaching 50% renewable electricity by 2015, and 100% by 2020. [2]

As a Clean Energy Solutions Provider for regional markets and industries, both nationally and internationally, we always keep an eye on the entire Renewable Energies and electricity refinement value chain. In addition to wind energy, the company's portfolio includes photovoltaics, battery storage and power-to-X technology with a focus on hydrogen.
