

What is Corre Energy's Project Roadmap?

Corre Energy's project roadmap with solutions of hydrogen-fuelled compressed air and hydrogen storage in salt caverns are globally scalable technologies that can offer decarbonisation and accelerate the journey towards net-zero targets. The EU's objective is to reach over 80% renewable energy by 2050.

How will Corre's funds help the energy industry?

The funds will help Corre to bring to financial close its flagship projects in the Netherlands and Denmark and to further develop its project pipeline across Europe. The company develops, builds and operates grid-scale energy storage using hydrogen-fuelled Compressed Air Energy Storage (hydrogen storage) and green hydrogen production.

What is Corre energy doing with Eneco?

Groningen-based Corre Energy has signed an agreement with Dutch energy supplier Eneco for offtake, co-development, and co-investment of a compressed air energy storage project in Ahaus, Germany. The project is based on four salt caverns in the German state of North Rhine-Westphalia with a potential to host a 500 MW storage system.

Does Corre energy have a pipeline?

Corre Energy's roadmap includes several potential projects in the pipeline, initially with two in the Netherlands and two in Denmark, Corre Energy has further underground energy storage projects located across the globe.

Who is Corre Energy BV?

Netherlands-based hydrogen-based energy storage developer Corre Energy BV on Wednesday signed a deal securing an investment of up to EUR 20 million (USD 24m) from Italian Energy Efficiency Fund II. Hydrogen tanks. Source: US Office of Energy Efficiency & Renewable Energy

How is Corre energy responding to demand for multiday energy storage?

Keith McGrane, CEO of Corre Energy, said the company is responding to increasing market demand for multiday energy storage by deepening its partnership with Siemens Energy. "By doing so we can offer a much-needed modular and standardised scalable CAES solution to the market providing storage for over 24 hours.

Corre concentrates on the development, construction and future operation of grid-scale underground renewable energy storage facilities, as well as the production and sale of green hydrogen.

We are leaders in Long Duration Energy Storage (LDES) projects. Explore Corre Energy's latest LDES projects today. Corre Energy is in a unique position to take advantage of global renewable energy targets,

using 100% renewable Compressed Air Energy Storage (CAES).

Corre Energy has formed a joint venture (JV) with SemperPower, a Dutch market leader in developing, financing, and operating battery energy storage systems (BESS), to deliver one of Europe's largest battery storage ...

Corre Energy is supporting the transition to net-zero by developing and commercialising Long Duration Energy Storage projects and products. Corre Energy is a pan-European mass energy storage platform which aims to create 100% renewable Compressed Air Energy Storage throughout Europe.

Netherlands-based hydrogen-based energy storage developer Corre Energy BV on Wednesday signed a deal securing an investment of up to EUR 20 million (USD 24m) from Italian Energy Efficiency Fund II.

We are leaders in Long Duration Energy Storage (LDES) projects. Explore Corre Energy's latest LDES projects today. Corre Energy is in a unique position to take advantage of global renewable energy targets, using 100% renewable ...

Corre Energy has formed a joint venture (JV) with SemperPower, a Dutch market leader in developing, financing, and operating battery energy storage systems (BESS), to deliver one of Europe's largest battery storage facilities at its Zuidwending site in the Netherlands.

Underground energy storage in the form of compressed air and green hydrogen can provide one of the cheapest forms of energy storage using proven technology. This reflects long asset life (35 years plus), unlimited storage cycles, and significantly low capital costs.
