

# Cost of solar panels for 3 bedroom house in Comoros

How much do solar panels cost for a 2 bedroom house?

The average pre-incentive cost of solar panels for a two bedroom house is around \$24,500, or \$17,150 after claiming the solar tax credit. However, the number of bedrooms is typically not a direct factor in sizing or pricing. While it can give you a loose sense of the system size, the actual cost depends on various factors such as location, system size, and installation costs.

How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161 for a three-bedroom house, or \$20,412 after claiming the 30% tax credit. However, as shown in the chart below, the number of bedrooms isn't a great indicator of the size and cost of a solar system - and neither is living space, for that matter.

How much does solar cost in 2022?

In 2022, the pre-incentive cost of solar systems installed on three bedroom houses ranged from \$9,720 to over \$50,000, according to data from solar.com. The average pre-incentive cost of solar panels for a three bedroom house is around \$30,880, or \$21,150 after claiming the solar tax credit.

How much do solar panels cost per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.
