

The order was placed by Aqualectra, Curacao's government-owned utilities company. The BESS, with its GEMS digital energy platform is intended to provide grid stability and reliability, reduce unserved energy and help mitigate the risk of brownouts and blackouts.

The [+X] is very unbalanced. 1/ drawing your entire library for 3BB is too cheap. 2/ drawing your entire library is an instant win-con. You'll never reach the end step, because you've drawn every thing you need to end game, so the drawback IS irrelevant. 3/ making all opponent draw any number of cards is worse.

The combination of Wärtilä's BESS and GEMS solutions, supported by the new power plant, will provide grid stability and reliability, reduce unserved energy, and help mitigate the risk of brownouts and blackouts.

The Wärtilä solution will support all these objectives through reducing generation costs, enabling the integration of renewables, and decreasing CO2 emissions, while providing high reliability...

Portable Power Solutions. Given that Curacao is a tropical island with many opportunities for outdoor adventures, you might find yourself away from a reliable power source for extended periods. In such cases, portable power banks or solar chargers can be invaluable. These devices offer a convenient backup power source, ensuring your essential ...

The BESS and the GEMS Digital Energy Platform will provide grid stability and reliability, reduce unserved energy and help mitigate the risk of brownouts and blackouts. In addition, the BESS system will allow Aqualectra to expand their renewables" vision thus allowing more renewable generation in the power system.

This latest order is for a new 38.4 MW power plant that will be capable of providing efficient grid balancing as the level of renewable energy in the system continues to increase. The order was booked by Wärtilä in Q3 2024. The new Salu Power Plant is being supplied on a full engineering, procurement and construction (EPC) basis.

The Battery Energy Storage System will contribute to a reduction of power outages on the island and optimizes the use of renewable energy and thereby lowers greenhouse gas emissions. This system also brings us a myriad of economic benefits, such as a cutback in peak demand charges and low electricity bills for consumers and businesses in Curaçao.
