

Who is mainspring energy backed by?

Customers include Fortune 500 companies like Kroger and Lineage Logistics, as well as utilities like PG&E, Florida Power and Light, and others. Based in Menlo Park, Calif., Mainspring is backed by top-tier investors. For more information on the company, technology, and products, please visit

Why do we need a mainspring generator?

“Mainspring's technology helps to support our move to net zero carbon energy. Mainspring generators improve energy independence and buffer our growing use of solar power, while offering the potential future use of zero carbon fuels like green hydrogen and others.”

Is mainspring a 'resilient' electric grid?

Major advancement for resilient, clean electricity MENLO PARK, Calif., June 22, 2022 /PRNewswire/-- In an important breakthrough towards a resilient, zero-carbon electric grid, Mainspring Energy today announced that its Mainspring Linear Generator has passed key tests directly running 100% hydrogen and 100% ammonia fuels at high efficiencies.

What is the scalability of the mainspring product?

The scalability of the Mainspring product allows for use in behind-the-meter applications as well as in large grids, microgrids, data centers, and similar operations that require support for 24/7 clean power, clean backup generation, and clean firming capabilities.

What fuels does mainspring use?

Its unique fuel flexibility allows it to automatically switch between fuels using innovative software-based control. In addition to hydrogen and ammonia, the Mainspring product runs on biogas, renewable natural gas, and other widely available gaseous fuels, and can switch between fuels automatically with software-based control.

What makes mainspring a good company?

The integration and cross-disciplinary nature of Mainspring's business requires intentionally seeking out others who bring different skills, perspectives, and priorities. Our culture of inclusion and respect extends beyond our team to interactions with our partners and customers.
