The Modernisation Fund will allocate 38% of at least 150 bln CZK (6 bln EUR) until 2030 for the deployment of Renewable Energy Sources (mostly solar PV). The rules and requirements are thoroughly described for preparing a successful application.

Acest pas presupune identificarea unor solutii care sa ofere o reducere a consumului de energie. Acestea pot include strategii de optimizare a consumului, precum schimbarea de echipamente care au un consum prea mare din cauza vechimii lor sau poate din cauza unor pierderi de energie, propunerea unor surse de energie regenerabila.

We have been on the photovoltaic market for over 10 years. Thanks to our wealth of experience in the design, construction and operation of solar power plants, we can design a comprehensive solution for you, including management of subsidies and financing.
