

Who is Das energy?

Welcome to DAS Energy in Wr. Neustadt Our expertise lies in the field of green technology, with a clear focus on the development and manufacturing of lightweight and flexible photovoltaic modules.

Where are Das energy photovoltaic modules made?

Since 2016, the high-quality DAS Energy photovoltaic modules have been manufactured at the site in Wiener Neustadt, Lower Austria and are distributed worldwide. In the process, the technology is constantly being further developed in the research and development center. The production capacity is currently 55 megawatts per year.

How many megawatts a year does Das energy produce?

In the process, the technology is constantly being further developed in the research and development center. The production capacity is currently 55 megawatts per year. DAS Energy founder and CEO Christian Dries has a background in the aviation industry, having founded Diamond Aircraft and running the enterprise successfully for many years.

The visit highlighted DAL's commitment to providing robust financial services to its clients and fostering sustainable energy solutions. DAS Solar, which operates in the markets of Asia, Europe, and South America, has subsidiaries in Germany, Australia, and Japan.

Our pioneering work in photovoltaic technology started in 2010. Christian Dries, founder and CEO of DAS Energy Ltd., and his team developed the world's first photovoltaic modules embedded in glass fiber reinforced composite material. ...

DAS Solar has announced a strategic cooperation agreement with Q Energy France for the supply of 75MW of its high-efficiency modules for a floating PV (FPV) project currently under construction...

Since 2016, the high-quality DAS Energy photovoltaic modules have been manufactured at the site in Wiener Neustadt, Lower Austria and are distributed worldwide. In the process, the technology is constantly being further developed in the research and development center.

Our pioneering work in photovoltaic technology started in 2010. Christian Dries, founder and CEO of DAS Energy Ltd., and his team developed the world's first photovoltaic modules embedded in glass fiber reinforced composite material. The technology used was inspired by aviation.

DAS Solar has announced that its N-type modules have received French carbon footprint ECS certification, a requirement of the French Energy Regulatory Commission (CRE) for all photovoltaic ...

DAS Energy - Photovoltaic modules - developed und produced in Austria. Solar power - anywhere. Large-scale photovoltaic systems with low load capacity for all types of roofs - industrial and commerical types of roofs.
