

This partnership enables smart capabilities for the Island by replacing their existing electricity meters with a new AMI platform, which will provide connectivity for nearly 50,000 residential ...

Trilliant, a leading international provider of solutions for advanced metering infrastructure (AMI), smart grid, smart cities and IIoT, and its partner Manx Utilities, are progress

Smart meters will help to bring the Island's energy system up to date; they will facilitate the development of the Smart Grid, which will enable Manx Utilities to match all sources of energy supply to demand and in turn reduce waste and increase efficiency.

Trilliant Partners with Manx Utilities to Commence Smart Electricity Meters Roll-out across the Isle of Man  
Replacement of legacy meters with a new AMI platform for 50,000 residential, industrial and commercial properties on the island

This partnership enables smart capabilities for the Island by replacing their existing electricity meters with a new AMI platform, which will provide connectivity for nearly 50,000 residential, industrial, and commercial customers with expansion options available to enable additional smart grid technologies in the future such as smart street ...

This partnership enables smart capabilities for the Island by replacing their existing electricity meters with a new AMI platform, which will provide connectivity for nearly ...

Our smart meter rollout represents an essential investment in our network. It aims to benefit residents through improved resilience and performance of our energy infrastructure. In the longer term, it will also support the Isle of Man Government's drive towards cleaner, greener, more sustainable energy for our Island.

Smart meters will form part of a smarter energy grid allowing Manx Utilities to be more precise about energy production and supply, enabling a reduction in waste and better support low carbon technologies for transport and heating.

They'll form part of a smarter energy grid which will allow Manx Utilities to be more precise about energy production and supply. The rollout will begin in June. Chairman Tim Baker says it's ...

Energy company Trilliant is helping Manx Utilities rollout smart electricity meters for 8000 prepayment users across the Isle of Man. North Carolina-based Trilliant provides advanced metering infrastructure (AMI), smart grid, smart cities and IIoT. It has launched similar island deployments in Aruba, Malaysia and the Dominican Republic.
