

Does Dominica have a national energy plan?

Dominica drafted a national energy plan in 2011 and revised it in 2014. The objective of the plan is to make electricity generation on the island self-sufficient by 2020 using sustainable and indigenous resources.

Can Dominica develop geothermal power?

Dominica is expected to develop more than 100 MW of geothermal power and has secured funding for early-stage investment through the World Bank's Geothermal Development Plan. The island may be able to secure additional international and private sector funding for these projects.

Does Dominica heavily rely on fossil fuels?

Despite having three hydroelectric plants on the Roseau River that produce 27.4% of Dominica's electricity supply in the present day, Dominica is not heavily reliant on imported fossil fuels as other islands in the region. In the 1960s, hydropower supplied 90% of Dominica's electricity.

Does Dominica have hydropower?

In the past, hydropower supplied 90% of Dominica's electricity. However, as population and electricity demand grew, diesel generator use increased and hydropower share diminished. Dominica Electricity Services Limited (DOMLEC) is the sole electric utility with an installed electrical generating capacity of 23.8 megawatts (MW) and a peak demand of 17.2 MW.

Who owns Dominica Social Security & Light & Power?

Dominica Social Security holds a 20% share and Light and Power Holdings, a subsidiary of Emera Corp., holds a 53% share in Dominica Social Security & Light & Power. The remaining 27% is owned by employees, private citizens, and local corporations.

How much wind power is available in Dominica?

Dominica has a wind power potential of 10 MW at Crompton Point in Saint Andrew and an additional 20 MW elsewhere in the country. After reviewing nine wind studies, DOMLEC came to this conclusion.

A new programme from the European Union has also been announced which will support Dominica's renewable energy sector through a multitude of ways. One of its aims is to render the country's international ...

Dominica's Renewable Energy initiatives are central to the nation's vision of achieving energy independence and sustainability. Known as the "Nature Island of the Caribbean", Dominica leverages its abundant natural resources -- geothermal, hydroelectric, solar, and wind energy -- to reduce reliance on imported fossil fuels, lower ...

The geothermal energy project in Dominica is estimated at US\$40 million for its first phase, focusing on

establishing a 7 MW geothermal power plant in the Roseau Valley. Additional funding, including grants and loans, has been secured from the World Bank (approximately US\$17.2 million) and the Clean Technology Fund, supporting further ...
