

What is Energas & AES Dominicana's vision for a sustainable future?

Energas and AES Dominicana shared a vision for a sustainable future in the Dominican Republic by diversifying the country's energy matrix with greener energy solutions while ensuring a strong, resilient grid.

Does Energas use natural gas in Dominicana?

Through AES Dominicana, we introduced natural gas into the country over 20 years ago, saving our customers over half a billion dollars and avoiding four million tons of CO<sub>2</sub> emissions every year. However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas.

Where is Energas located in the Dominican Republic?

Energas is a major electricity generator in the Dominican Republic through the 300 MW San Pedro de Macor's Electricity Company (CESPM) power plant, located in the Eastern region of the country.

Does the Dominican Republic need a natural gas infrastructure solution?

However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas. The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas.

According to the "2023 Climatescope Ranking" by Bloomberg New Energy Finance (BNEF), which assesses the attractiveness of markets for foreign investment in energy transition, the Dominican Republic has improved ...
