A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate in the spot market without a power purchase agreement (PPA), showcasing the growing confidence in the Dominican energy sector.

USTDA's grant will help create enabling regulations for battery energy storage systems to maintain the stability of the country's power grid as new wind and solar power plants are built. USTDA and SIE announced their collaboration during the COP26 summit.

The new regulation, officially issued after completing administrative steps, will require projects of more than 20 megawatts to include at least 50% battery storage capacity. Veras stressed that energy storage is now a critical public policy, supported by President Luis Abinader, who considers this measure essential to ensure the success of the ...

The Dominican Republic has committed to a target of 25% renewable energy share by 2025 Solar energy will lead from the front as the country diversifies its energy generation mix to cleaner ...

Greensmith Energy, a Wärtilä company, commissioned a 6 MW/6 MWh energy management and storage system for ContourGlobal Bonaire on the Caribbean island of Bonaire. Image: Greensmith Energy

The new regulation, officially issued after completing administrative steps, will require projects of more than 20 megawatts to include at least 50% battery storage capacity. Veras stressed that energy storage is now ...

Zenith Energy Corp SRL, a subsidiary of Blacktree Capital Management, has initiated construction of the 101.2-MWp Dominicana Azul solar farm in the Dominican Republic, launching a project that will boast the ...

A "hybrid power plant", controlling the grid for an entire island and its inhabitants, will be created with the addition of a management and control platform from energy storage system integrator Greensmith.

The Dominican Republic's national energy commission (CNE) has signed a definitive concession for the project called Photovoltaic Installation Santa Clara Energy Group, which aims to install 67.7 MW/84 MWp of solar capacity and an energy storage facility.

Dominican Republic greensmith energy storage

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisi#243;n Nacional De Energia (CNE) of ...

The Dominican Republic has committed to a target of 25% renewable energy share by 2025 Solar energy will lead from the front as the country diversifies its energy generation mix to cleaner sources Energy storage is also high on the agenda with a target of around 250 MW to 400 MW of installed capacity

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisi#243;n Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December).

Zenith Energy Corp SRL, a subsidiary of Blacktree Capital Management, has initiated construction of the 101.2-MWp Dominicana Azul solar farm in the Dominican Republic, launching a project that will boast the Caribbean nation's first ...
