Should draconic evolution power storage get bigger?

Draconic evolution power storage is cool and all but I think it should get bigger as it charges up. There's no difference when it's full so might as well build it for looks and leave it unpowered.. I just don't see the point of storing that much power anyway.

How much power does a draconic energy cube reactor make?

The reactor kicks on when I need a big boost of power to fill my Tier 4 Draconic Energy Cube. It makes about 28k RF/t with 13 fuel rods. Eventually, I'll expand to turbines on my reactor. I'm using solar panels from environmental tech but they can't quite keep up.

Is draconic evolution a good mod?

I'm quite new to the modded minecraft world. Draconic evolution is one of the mods that caught my attention right from the beginning. I got the setup to get good amounts of draconium ingots in my SF3 world, but my problem is the insane amounts of energy it requires for everything.

I upgraded my Tier 7 energy storage to a Tier 8 when I filled up the Tier 7. I left the stabilizers and the energy core alone and just replaced the blocks needed to upgrade. The core was valid and I enabled it.
