

Harnessing solar radiation from both sides with a bifaciality rate of up to 70%, this module, when paired with a tracker, offers a 1+1>2 effect, maximizing your return on investment. Experience higher performance gains and lower levelized cost ...

Bifacial (literally meaning "two faces") solar modules can generate energy not only from the front side but from the rear side as well - reflecting the sunlight on the ground to the glass-covered back of the module to produce extra energy in a solar-powered system.

Vertex S+ is the first rooftop module on the market to feature a robust dual-glass structure, replacing the plastic backsheet with a second layer of glass. As such, dual-glass designs are highly reliable and a perfect protection over decades, making this module structure extremely resistant to salt spray, acids, and alkalis.

Explore our selection of complete solar packages and combo deals, designed to provide everything you need for efficient, eco-friendly energy solutions. Perfect for homes or businesses, these bundles include solar panels, inverters, and batteries for ...

Generate solar energy anywhere with our compact-designed panels. Fold away to store in your van or closet, pull them out in seconds to start using. With a universal solar connector, plug and play with almost all power stations on the market, as well as EcoFlow's own.

-Bifacial panels perform particularly well in environments with high albedos, such as snowy areas or light-colored surfaces, where sunlight is reflected back onto the rear side of the panel. This boosts energy output compared to traditional panels.

Enjoy the benefits of a high-quality solar panel system, including independence from loadshedding and reduced electricity costs. Browse our high-quality solar panels to start your path to electrical independence.
