

Eco Green Energy is set to embark on a significant solar initiative in the U.S. Virgin Islands, with the introduction of an 8MW solar project powered by the latest Atlas 550W solar panels. This venture represents a pivotal step towards establishing a more sustainable and resilient energy infrastructure in the region.

U.S. Virgin Islands This profile provides a snapshot of the energy landscape of the U.S. Virgin Islands (USVI)--St. Thomas, St. John, and St. Croix. The Virgin Islands archipelago makes up the northern portion of the Lesser Antilles and the western island group of the Leeward Islands, forming the border between the Atlantic Ocean and the Caribbean

The U.S. Environmental Protection Agency will send \$62.45 million to the territory for residential community solar and power storage projects, federal officials announced Monday. Awarded through the Solar for All grant program, the funding is meant to allow the Virgin Islands Energy Office to develop long-lasting solar programs that enable low ...

The innovative financing program offered Virgin Island resident's loans of up to \$30,000 to use towards the installation of solar photovoltaic (PV), and solar PV systems built in conjunction with battery storage.

US Virgin Islands Solar Power Residential & Commercial Solar Services Professional solar power systems provide factories with customized designs that maximize energy production based on specific site conditions, allowing businesses to lower operational costs significantly.

The new Virgin Islands Solar for All Program has the power to transform the U.S. Virgin Island's residential energy landscape, addressing residents' high electricity costs while creating new opportunities for energy resilience and reliable, affordable, clean power for communities most in need.

The U.S. Environmental Protection Agency will send \$62.45 million to the territory for residential community solar and power storage projects, federal officials announced Monday. Awarded through the Solar for All grant ...

This program is exclusively available to full-time USVI homeowners with no existing solar installed. Selected applicants will receive a 15-year loan with an annual interest rate of 1% to install an approved solar energy system tied into the Territory's power grid.

With the growing intensity of storms in the Caribbean, resilient energy infrastructure now plays a crucial role in the Caribbean's transition to a reliable, clean power system. The Donoe solar farm in St. Thomas, U.S Virgin Islands was originally built in 2015 but sustained significant damage during the 2017 hurricane season.
