

How can Eaton help commercial vehicle manufacturers transition to 48 volt systems?

Eaton can assist commercial vehicle manufacturers in the transition to 48-volt systems with a variety of technologies that reduce mechanical and incorporate more electrical components. Ready to get started? Tell us about your project or just have a simple inquiry, reach out to our team.

Who is Eaton eMobility?

Join our growing eMobility team today! eMobility combines elements of Eaton's Electrical and Vehicle businesses to deliver electric vehicle solutions to passenger car, commercial vehicle and off-highway OEMs.

How has Eaton changed over the years?

In the years since, Eaton has re-focused on investing in business continuity and reducing demand on local energy infrastructure, all while committing to reduce carbon emissions from its operations by at least 50 percent by 2030.

What is Eaton & Enel X's Solar & Storage Microgrid?

Eaton and Enel X partnered to develop and finance a solar + storage microgrid at Eaton's Arecibo manufacturing site by leveraging their respective intelligent power management capabilities.

Why should you choose Eaton?

With a broad spectrum of experience and resources in industrial electrical applications and vehicle systems, Eaton is the right partner to help hybrid (PHEV, HEV) and battery electric vehicle (BEV) manufacturers take on these unique electrification challenges.

Can Eaton withstand a hurricane?

The system supplements Eaton's existing 8 MW of backup generation, and is designed to withstand Category 5 hurricanes. Using its 5 MW solar array and 1.1 MW battery storage, the project is projected to reduce 4,500 MT of GHG emissions annually and provide renewable energy for over half of the site's annual consumption.

Eaton, has announced substantial investments in its North American manufacturing and operations, totaling more than \$500 million. These investments are aimed at supporting the surging demand for its electrical solutions in various sectors, including utility, industrial, and residential markets across North America.

5 ???· Power management company Eaton, one of the top suppliers for industrial and electrical distributors, has announced significant investments in its North American manufacturing and operations to support the growing demand for its electrical solutions.

With the microgrid, Eaton will be positioned to provide excess power back to the grid, which benefits the local

community and reduces demand on the island's electric utility. In the future, Eaton and Enel X will seek opportunities to expand their clean microgrid solution across the island, helping Puerto Rico rebuild its electric grid on the ...

IRELAND - Power management company Eaton has completed the acquisition of Royal Power Solutions, a U.S.-based manufacturer of electrical connectivity components used in electric vehicle, energy management, ...

This week, power management company Eaton and Enel X announced plans for a second joint microgrid project in Puerto Rico. Both projects will reduce demand on regional energy infrastructure and enable Eaton to ...

IRELAND - Power management company Eaton has completed the acquisition of Royal Power Solutions, a U.S.-based manufacturer of electrical connectivity components used in electric vehicle, energy management, industrial and mobility markets.

5 ???· Power management company Eaton, one of the top suppliers for industrial and electrical distributors, has announced significant investments in its North American ...

As a global power management company, we help our customers solve their greatest power challenges through our industry leading electrical, aerospace, hydraulic and vehicle products and services. For more than 100 years, our teams have helped people work more safely, be more energy efficient and live more sustainably.

Eaton in April announced completion of a microgrid project to provide power for its manufacturing facility in Arecibo, Puerto Rico. Enel North America built, owns, and operates the system on ...

This week, power management company Eaton and Enel X announced plans for a second joint microgrid project in Puerto Rico. Both projects will reduce demand on regional energy infrastructure and enable Eaton to power its manufacturing plants with more renewables and boost energy resilience for its operations, said the companies in a press release.

We provide sustainable solutions that help our customers effectively manage electrical, hydraulic, and mechanical power - more safely, more efficiently, and more reliably. Eaton's 2020 revenues were \$17.9 billion, and we sell products to customers in more than 175 countries.

We are developing comprehensive electric vehicle charging infrastructure (EVCI) solutions and services that unite the power needs of buildings and electric vehicles (EVs) with on-site ...

We are developing comprehensive electric vehicle charging infrastructure (EVCI) solutions and services that

unite the power needs of buildings and electric vehicles (EVs) with on-site renewable energy generation.

Eaton, has announced substantial investments in its North American manufacturing and operations, totaling more than \$500 million. These investments are aimed at supporting the surging demand for its electrical ...

Eaton announces a significant investment exceeding \$500 million to bolster its North American manufacturing capabilities. The move aims to meet increasing demand for electrical solutions in diverse sectors, including utility, healthcare, and commercial markets.
