

Why is electricity expensive in Kosovo?

Usually, in Kosovo the imported energy is much more expensive than export. This is because Kosovo imports energy one day before needed, in the other hand energy is exported during the night when the demands are under generating level. Imports and exports have a negative impact for electrical energy price.

Which companies are affecting the energy sector in Kosovo?

Besides government institutions, there are also companies with great impact in energy sector such as Kosovo Energy Corporation ( KEK ), Transmission, System and Market Operator ( KOSTT) and Kosovo Electricity Distribution and Supply (KEDS). A lot of legislative documents that aim the adjustment of electricity sector have been approved.

Is Kosovo a member of the Energy Community?

Kosovo is a member of the Energy Community, an international organisation that brings together the European Union and its neighbours in southeast Europe to create an integrated pan-European energy market. The organisation was founded by the 2006 Energy Community Treaty to extend the EU internal energy market to southeast Europe.

What is the energy strategy for Kosovo?

The Kosovo energy strategy includes increasing RES capacity to 35% of electricity consumption by 2031. Aiming for 600 MW wind, 600 MW solar PV, 20 MW biomass & at least 100 MW of prosumer capacity, to reach a total installed RES capacity of 1600 MW by 2031. Lignite exploitation in Kosovo started in 1922.

How can Kosovo reduce its electricity consumption by 2030?

Investment in energy efficiency: Incremental investment in public and residential buildings, including district heating, could reduce Kosovo's national electricity consumption by about 600 GWh by 2030, according to the World Bank options study.

How inherited issues have affected the energy sector in Kosovo?

The inherited issues after the war in Kosovo and the transition period have had an immense effect on the progress of this sector. Regulation of activities in energy sector in Kosovo is a responsibility of the Energy Regulatory Office (ERO).
