

How much is a solar power plant worth in Egypt?

On Saturday, in the city of Aswan, Egypt, a solar power plant valued at \$500 million was inaugurated. This is part of efforts to increase renewable energy production after last year's significant power outages, the country's authorities announced.

Why is Egypt launching a 500 million solar plant in Aswan?

Egypt inaugurated a \$500 million solar plant in the southern city of Aswan on Saturday as part of its push to boost renewable energy production after last summer's severe power outages. The Abydos Solar PV Plant, which was developed by Dubai-based energy company AMEA Power, has a capacity of 500 megawatts and was completed in just 18 months.

Where can solar power be developed in Egypt?

Utility-scale PV development has, thus far, clustered around Aswan in the south of the country, where solar resources are strongest and there is plenty of land for development. The biggest chunk of Egyptian solar capacity is provided by the Benban project, which lies 50 km from Aswan and is one of the world's biggest PV sites.

Will a solar power plant help Egypt deal with power shortages?

The solar plant "will accelerate Egypt's green power strategy and help it deal with power shortages that took place over the past year", said the chairman of AMEA Power, Hussain Al Nowais, adding that the first electricity from the plant was delivered to the national grid last week.

Why does Egypt invest in solar energy?

Egypt invests in solar energy. "New strategy"; During the power plant's opening ceremony, Egypt's Prime Minister, Moustafa Madbouly, emphasised that this project is a "key step in increasing the use of renewable energy in Egypt" and is part of the "national strategy aimed at reducing dependence on traditional energy sources."

How much solar power does Egypt have?

The biggest chunk of Egyptian solar capacity is provided by the Benban project, which lies 50 km from Aswan and is one of the world's biggest PV sites. Official figures on its capacity vary from 1.4 GW up to 1.8 GW, with the confusion apparently centering on the scope for expansion of some individual elements.

2 ???#0183; Aswan Governorate, Egypt, 14 December 2024 - AMEA Power, one of the fastest growing renewable energy companies in the region, announced today, the commissioning of its 500MW Abydos Solar PV Plant in Egypt.
