

In recent years, AES El Salvador has intensified its efforts to modernize the country's electrical infrastructure by implementing advanced technologies and innovative solutions that improve energy efficiency and reduce service interruptions.

In an increasingly demanding and competitive world, at AES El Salvador, together with our people, our customers, communities and partners, we continue accelerating a safer, sustainable and intelligent energy future to improve the life of all Salvadorans.

Netherlands-based sustainable energy company MPC Energy Solutions NV (OSE:MPCES) said on Wednesday it had recently inaugurated its two solar farms with a combined capacity of 21.07 MWp in El Salvador.

Besides, we offer products and services of infrastructure and electrical installations that guarantee the highest quality standards in the industry, and for your home, we count on energy solutions, as well as on insurance and assistance to make your life easier.

Este día, AES El Salvador y su empresa AES Soluciones, inauguraron la planta de energía solar: Opico Power, que genera 5.2 megavatios (MWp) de energía sostenible, y reducirá la emisión a la atmósfera de 2,371 toneladas de dióxido de carbono (CO2) al año.

CECSA, a subsidiary of the National Electrical Transmission Entity (ENTE), has unveiled the first two hybrid power plants in El Salvador, integrating hydroelectric and photovoltaic generation. Situated in San Matías and San Luis, these ...

Roberto Sandoval, Director General of AES El Salvador's Solutions Division, highlighted the strategic nature of the Ilopango Solar plant, emphasizing the company's commitment to diversify the energy matrix and ...

Roberto Sandoval, Director General of AES El Salvador's Solutions Division, highlighted the strategic nature of the Ilopango Solar plant, emphasizing the company's commitment to diversify the energy matrix and accelerate the future of energy in El Salvador.

Este día, AES El Salvador y su empresa AES Soluciones, inauguraron la planta de energía solar: Opico Power, que genera 5.2 megavatios (MWp) de energía sostenible, y reducirá la emisión ...

AES' Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to isolated island

communities and support economic growth in the Gulf of Fonseca region of El Salvador.

As global energy demand grows and environmental concerns escalate, projects like the AES Meanguera del Golfo solar plant demonstrate the immense potential of renewable energy sources, such as solar power, backed by advanced battery storage solutions.

AES" Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to ...
