

What is elexsys technology?

The world-leading eleXsys technology unleashes the full potential of locally generated renewable energy by solving major voltage problems. It allows clean energy generation such as commercial rooftop solar to feed multiple times more energy back into existing grids without the need for expensive infrastructure and equipment upgrades.

What is elexsys energy?

eleXsysEnergy is the developer and manufacturer of the eleXsys technology, an innovative and award-winning solution to voltage issues that can be created by clean energy producers - such as solar energy systems - trying to send energy back to electricity grids that were designed to send, not receive, energy.

Is elexsys a good company?

Elexsys' technology has also won a number of local and international accolades, including in 2021 the Award for Energy & Renewables at InnovationAus' inaugural Awards for Excellence and first prize in the Renewable Energy Category at the 2021 Davos Energy Week Awards.

What is Elexsys Energy Plc?

Elexsys Energy Plc is an active company incorporated on 1 October 2020 with the registered office located in London, Greater London. Elexsys Energy Plc has been running for 1 year 9 months. There are currently 5 active directors and 1 active secretary according to the latest confirmation statement submitted on 30th September 2021.

Where is elexsys energy located?

eleXsys Energy established offices in the USA, Europe and the Asia Pacific, and new partnerships to enable rapid global expansion. An international investment banking and financial services company was engaged to assist with capital raising and more award wins were achieved.

Who nominated elexsys energy?

eleXsys Energy was nominated by official Nominator Purpose Driven Innovation Ecosystem (PDIE Group), an organisation that nominated the eventual winner in the Fix Our Climate category in 2021.
