

Are emergency lighting systems mandatory in Turkey?

An emergency lighting system might be mandatory depending on your building's class and number of users. In Turkey, Regulations for Fire Protection of Buildings first published in 2002 and most recently renewed in 2009, requires that most buildings have emergency lighting systems.

Can a battery emergency lighting system report a problem?

There are central battery emergency lighting systems that can report on fixture and line malfunctions on a line basis or with individual addresses.

What is an EBST battery?

The EBST series of commercial steel battery units is designed to provide efficient and reliable emergency lighting. Utilizing a sturdy, all steel housing, the EBST presents a modern and unobtrusive design. On higher capacity models, the cabinet front is sloped to allow better internal access and superior low angle light distribution.
