

At Eminent, we see ourselves assisting the efficient energy transition. We are committed to provide more sustainable and cleaner energy solutions in our business. We are active on both mandatory and voluntary carbon markets as well as renewable investments.

Increasing renewable energy. HOW WE'RE TRACKING PROGRESS: Transitioning Guam's energy from imported fossil fuels to renewable sources, supporting Guam residents to integrate household energy efficiency, and updating Guam's Strategic Energy Plan and Action Plan to map a path towards 100% renewable energy by 2045.

The National Renewable Energy Laboratory is working with Guam government and energy leaders to help the island reach its goal of 50% renewable energy by 2035 and 100% by 2045. The U.S. territory depends on expensive fuel oil imports for its power.

At Eminent, we recognize the importance of balancing economic growth with environmental and social responsibilities. We are committed to minimizing our environmental impact and fostering positive social change in the communities where we operate.

the eminent methodology We identify regulatory requirements in each country, and our client's operational needs. We design and carry out agile, time-saving and cost-effective processes for the detection - repair - verification - report - regulatory compliance cycle.

Eminent Energy invests in cutting-edge renewable technologies such as solar, wind, hydro, and bioenergy to facilitate the shift towards a low-carbon economy. We drive innovation, create job opportunities, and contribute to the global goal of reducing greenhouse gas emissions by partnering with sustainable energy solution providers worldwide.
