

What is EnCap energy storage?

Breaking free from conventional lithium-ion batteries, ENCAP is set to redefine the future of energy storage with its cutting-edge features and unmatched performance. Key Features: Graphene Powerhouse: ENCAP utilizes advanced graphene technology to store energy, offering unparalleled efficiency and reliability.

What is EnCap - India's pioneering energy storage solution?

In a groundbreaking leap in the world of energy storage, iNVERGY proudly presents ENCAP - India's pioneering energy storage solution that harnesses the power of graphene. Breaking free from conventional lithium-ion batteries, ENCAP is set to redefine the future of energy storage with its cutting-edge features and unmatched performance.

What makes EnCap a good battery?

Its unique properties make it an ideal candidate for high-performance batteries. The use of graphene ensures that ENCAP delivers unmatched efficiency and reliability in storing and releasing energy. It marks a significant departure from traditional battery technologies.

What is EnCap used for?

ENCAP is tailored for various applications, including: Graphene, a single layer of carbon atoms, forms the basis of ENCAP's energy storage capability. Its unique properties make it an ideal candidate for high-performance batteries. The use of graphene ensures that ENCAP delivers unmatched efficiency and reliability in storing and releasing energy.

How long does EnCap last?

ENCAP is not just a short-term solution. With an impressive 25 years of calendar life, it ensures sustained performance over an extended period. The robust design of ENCAP allows it to endure an astonishing 500,000 charging cycles, providing users with longevity rarely seen in energy storage solutions.

What is EnCap by invery?

Join the energy revolution with ENCAP by iNVERGY - where graphene innovation meets sustainability for a brighter and more efficient future. ENCAP by iNVERGY: Cutting-edge graphene battery with 25-year life, 500,000 cycles, OLED display, zero maintenance, and eco-friendly design.

**Battery Deep Discharge Protection:** Deep discharging can damage batteries. ENCAP safeguards against this, prolonging the life of the battery and ensuring consistent performance. **Battery Overcharge Safety:** Overcharging is a common concern. ENCAP addresses this with built-in safety measures, preventing damage to the battery and associated components.

Breaking free from conventional lithium-ion batteries, ENCAP is set to redefine the future of energy storage

with its cutting-edge features and unmatched performance. Key Features: Graphene Powerhouse: ENCAP utilizes advanced graphene technology to store energy, offering unparalleled efficiency and reliability.

The Encap 10kWh module by Enercap and Emtel Energy is the most advanced energy storage consisting of highly efficient 99.1% round trip efficiency, this module is made up of an encapsulated cell that is non-degradable and has an ...

Encap supercapacitor-based energy storage offers 500,000 life cycles surpassing lithium-ion batteries that typically offer 6,000 lifecycles. High efficiency: With 99.1% round trip efficiency, ...

Encap storage is used for energy storage applications, like batteries, i.e. where large amount of energy are delivered over long periods of time. Applications such as Telecom Towers, Residential Backup, Grid Storage, EV Charging Stations, Microgrids etc.

Encap supercapacitor-based energy storage offers 500,000 life cycles surpassing lithium-ion batteries that typically offer 6,000 lifecycles. High efficiency: With 99.1% round trip efficiency, these systems maximize usage while minimizing energy loss during charging and discharging.

ENCAP Energy Storage, developed by Enercap's, meets these demanding requirements - non-chemical Supercap based, with long life, no capacity degradation, environmentally sustainable and recyclable, and with abundant availability of raw materials.

ENWALL comes with Enercap's patent ENCAP and ENSERVER cutting-edge technology. The ENWALL system can be charged by the grid, solar, wind, or genset in either standalone, standalone grid-tied, standalone off-grid, gridtied hybrid, or off-grid hybrid mode.

EnCap is an Encapsulated Hybrid Graphene, Solid State and Tantalum Capacitor. Almost fully biodegradable and over 90% recyclable; EnCap modules store energy electrostatically. Has a charging discharge rate of 1c TO 10c. Has a 99.9% Depth of Discharge (DOD) with a ...
