

OverviewElectricityPetroleumCoalRenewable energy (other than hydroelectric)See alsoThe Democratic Republic of the Congo has reserves of petroleum, natural gas, coal, and a potential hydroelectric power generating capacity of around 100,000 MW. The Inga Dam on the Congo River has the potential capacity to generate 40,000 to 45,000 MW of electric power, sufficient to supply the electricity needs of the whole Southern Africa region. Ongoing uncertainties in the political arena, and a resulting lack of interest from investors has meant that the Inga Dam's potential ha...

The Democratic Republic of the Congo is a country located in the African Great Lakes region of Central Africa. It is the second largest country in Africa by area and the eleventh largest in the world .

Nuru, based in Goma, DRC, is one of Africa's pioneering renewable energy-powered metrogrid companies. By delivering world-class renewable energy and connectivity services, Nuru aims to empower 5 million Congolese people, one connection at a time.

The DR Congo imported 78 million kWh of electricity in 2007. The DR Congo is also an exporter of electric power. In 2003, electric power exports came to 1.3 TWh, with power transmitted to the Republic of Congo and its capital, Brazzaville, as well as to Zambia and South Africa.
