

In its second phase, the project will install an additional 60 MWp of solar photovoltaic panels, also equipped with a 15-hour battery energy storage system. This will form a 120 MWp solar power plant spread over a 251 hectare site in the locality of Ay&#233;m&#233; Plaine, located some thirty kilometres from the capital Libreville.

Le projet de la centrale solaire hybride de Ndjol&#233; (1440 panneaux) constitue la premi&#232;re application de la technologie fuel save au Gabon. Les panneaux photovolta&#239;ques de la centrale sont reli&#233;s &#224; 3 onduleurs de 100 kW.

Dans un premier temps, Solen SA Gabon, la filiale de Solen Renewable Duba&#239; installera des panneaux solaires d'une capacit&#233; cumul&#233;e de 60 MWc, &#233;quip&#233;s d'un syst&#232;me ...

The Ndjol&#233; hybrid solar power (1.440 panels) plant project is the first application of fuel save technology in Gabon. The plant's photovoltaic panels are connected to three 100 kW inverters. The solar power generated is sent to the transformer station over a medium-voltage line, and then a further 500 m to the national grid, using 7 poles ...

Les travaux de construction de cette centrale solaire photovolta&#239;que, que le Gabon pr&#233;sente comme la plus grande d'Afrique centrale, avaient d&#233;marr&#233; en ao&#251;t 2022 pour une livraison pr&#233;vue en juillet 2023. Ce d&#233;lai n'a finalement pas &#233;t&#233; ...

In its second phase, the project will install an additional 60 MWp of solar photovoltaic panels, also equipped with a 15-hour battery energy storage system. This will form a 120 MWp solar power plant spread over a 251 ...
