Uzbekistan's Ministry of Energy said on its Telegram channel: "Signed a memorandum of understanding with China Energy Construction Group on the construction of solar photovoltaic power plants with a total capacity of 2,000 megawatts in Uzbekistan."

JSC "Uzenergoengineering" and Energy China International agreed to cooperate in organizing an international educational institution in Uzbekistan in the field of electric power and new technologies, with a preliminary investment amount of \$30 million.

The two new energy projects launched by CEEC this time make full use of the abundant local resources, promote the development of local new energy with high efficiency and high quality, and help Uzbekistan and the global energy structure transformation and upgrading.

Crafting comprehensive short-term and long-term plans for Uzbekistan's electric power industry, integrating modern considerations such as the expansion of renewable energy capacities.

Simultaneously, the initiative is expected to make a positive impact on the local economy by creating approximately 1,600 jobs, contributing to both employment and the growth of the renewable energy sector in Uzbekistan.

Invested and built by China Gezhouba Group Overseas Investment Co., Ltd., a subsidiary of China Energy Engineering Group Co., Ltd (Energy China), the project is the largest electrochemical energy storage project invested by a Chinese enterprise overseas.

JSC "Uzenergoengineering" and Energy China International have reached a collaborative agreement to establish an international educational institution in Uzbekistan, focusing on electric power and emerging technologies.

Saudi renewables developer ACWA Power Co (TADAWUL:2082) has selected Energy China Group Corporation (CEEC) as engineering, procurement and construction (EPC) contractor for a 400-MW solar

project in Uzbekistan.

Simultaneously, the initiative is expected to make a positive impact on the local economy by creating approximately 1,600 jobs, contributing to both employment and the ...
