

Is West Africa's next energy hub?

Senegal, Ivory Coast and Ghana have launched ambitious projects and made bold statements in their bids to become West Africa's next "energy hub". Those efforts, however, are a long way from unseating dominant Nigeria.

What is the Energy Hub?

The Energy Hub is a device that allows you to generate, store, and monitor your solar power. It ensures your home stays on regardless of what mother nature throws at you and irrespective of the power company de-energizing the power lines. The hybrid inverter connects solar panels, batteries, generator, and the backup interface.

What is the National Energy Hub?

The National Energy Hub is an award-winning specialist business energy procurement company that has helped hundreds of organisations to achieve better business energy prices. Our clients aren't energy experts; instead, they rely on us to do the work.
