

How much oil does Argentina produce per day?

In September 2024, production averaged 738,000 barrels per day (b/d) of crude oil in Argentina, 15% more than in September 2023 and the most in any month since 2003. In September, oil produced in the Vaca Muerta formation accounted for 58% of the country's total output, according to SESCO.

Why are oil and natural gas production rising in Argentina?

Crude oil and natural gas production in Argentina are both nearing record highs, driven by increasing output from the Vaca Muerta shale formation, which is offsetting declining output from conventional oil and natural gas fields.

Why did Argentina's natural gas imports fall 47% in 2024?

Argentina's natural gas imports via pipeline fell by 47% in the first nine months of 2024 compared with the same period in 2023. The decline was largely because pipeline imports from Bolivia, which made up around half of Argentina's natural gas imports in 2023, ended in September 2024.

discouraged the implementation of our EnMS: energy price in Argentina in 2011 was low and, because of an operation mostly dependent on engineering and sales, energy was not a significant production cost for us. Anyhow, we assumed that sooner or later energy consumption control would become important for our society.

In support of the region's energy goals, the report explores the opportunities and challenges that lie ahead. It provides insights on the ways in which the outlook for the region and the biggest global energy trends are ...

Argentina: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Argentina's natural gas reserves have the potential to make the country a global energy transition power player. Discover how new government initiatives can make this a reality by boosting production and exports.

2023 Global Energy CEO Outlook; En un contexto marcado por las grandes tensiones geopolíticas, el rápido crecimiento de la IA generativa y la incertidumbre económica, los directores ejecutivos del sector energético -incluidos los de recursos naturales y productos químicos (ENRC)- sostienen perspectivas de crecimiento de sus empresas y ...
