

Will Saudi Arabia achieve net zero emissions by 2060?

By 2060, the Kingdom of Saudi Arabia (KSA) aims to achieve net zero greenhouse gas (GHG) emissions, targeting 50% renewable energy and reducing 278 million tonnes of CO₂ equivalent annually by 2030 under Vision 2030. This ambitious roadmap focuses on economic diversification, global engagement, and enhanced quality of life.

Why should Saudi Arabia implement Net Zero?

Implementing net zero allows Saudi policymakers to reduce domestic consumption of fossil fuels, particularly oil, which will be retained for higher value use. The net zero goal also justifies continued improvements in efficiency of buildings, appliances and vehicles. Progress in these ventures allows Saudi Arabia to buttress its external influence.

Does Saudi Arabia have an energy efficiency program?

Figure 2: Saudi's energy transition journey. Source: Authors. One of the first energy efficiency initiatives in the KSA is the launch of the National Energy Efficiency Program in 2003 as a three-year program to improve the management and efficiency of electricity generation and consumption in the kingdom.

Why is Saudi Arabia developing alternative energy sources?

Along with joining global forces to addressing climate change and accelerating the needed energy transition, Saudi Arabia is driven by other socio-economic factors to developing alternative energy sources.

Will Saudi Arabia generate 50% of its electricity from renewables?

In January 2021, Saudi Arabia announced its intent to generate 50% of its electricity from renewables by 2030, with the other half coming from natural gas-fired power generation (Paraskova, 2021). The total renewable energy installed capacity in Saudi Arabia has increased from 3 MW in 2011 to 413 MW in 2020 (Figure 3).

Will Saudi Arabia invest \$270 billion in low-carbon energy projects?

Saudi Arabia has declared its intention to invest \$270 billion in low-carbon energy projects by the year 2030. Table 3 shows major investment projects in Saudi Arabia for energy transition. Table 3. Overview of major investments in Saudi Arabia's energy transition and RE initiatives RE = renewable energy; SAR = Saudi Riyals.

The shift from fossil fuels to low-carbon energy solutions is crucial to mitigate the effects of climate change. The Kingdom of Saudi Arabia (KSA) has formulated a policy framework to accelerate the development of renewable energy (RE) as part of Vision 2030. Therefore, the transition to RE is vital for reducing dependence on fossil fuels and mitigating climate change.

Decarbonizing the transport sector will likely play a crucial role for Saudi Arabia in fulfilling its target of reaching net-zero greenhouse gas (GHG) emissions by 2060. While clear and immediate low-carbon or zero-carbon alternatives exist in some sectors, the transport sector faces challenges. For instance, there are promising solutions for passenger cars, but solutions ...

Faisal Alzahrani, managing director of IMS, has said "IMS" full digitalisation package aligns perfectly with Saudi Arabia's ambitious pledge to cut carbon emissions to net zero by 2060." Services: Inspection and Certification; Marine Materials Warehouse; Vessel Digitalisation; Ship ...

We offer total energy solutions for commercial and industrial companies in Saudi Arabia. We help clients take control of their energy!
