Are recycled shipping containers a good choice for off grid homes?

When it comes to off grid homes, recycled shipping containers are a logical starting point for DIYers, off gridders, and those just looking for an affordable home. Shipping containers are portable, economical, and can be arranged in countless ways to create the tiny house of your dreams or the ultra-modern multi-family housing unit.

What is the smallest shipping container home?

Here's the smallest shipping container home on this list so far. Some home design companies, like Rhino Cubed, specialize in making tiny homes out of one or two small containers. Their home plans are often between 300 and 500 square feet, acting as a spacious bedroom and all-in-one living space.

How much does a container home cost?

If DIYing your own home isn't your thing, there are plenty of shipping container home companies with all kinds of beautiful modular homes for sale. Most of these are built at the company's headquarters and shipped by truck to the buyer's location. Here is our list of 17 container home companies updated for 2024: Price: \$35,900 - \$108,000

What is a stacked container home?

Carroll House is a great example of this style. In stacked container homes, windows are popular to keep the space open. This, along with other structural concerns with shipping containers, tends to cost more than a shipping container home that doesn't have an upstairs area.
