

How much do Enphase IQ batteries cost?

Based on our industry research, an average-sized system that includes two Enphase IQ 5P batteries should cost around \$15,000 before incentives. Enphase IQ batteries also qualify for the federal clean energy tax credit that can reduce that cost by 30%, as well as other state solar battery incentives.

Can I install Enphase IQ batteries without a backup?

As shown in the above graphic, it is possible to get Enphase IQ batteries installed at your home for solar self-consumption without backup functionality. In this setup, you can skip installing the System Controller and IQ Combiner, and simply connect an IQ battery to your main load panel.

Should you buy an Enphase battery for home backup power?

When you buy an Enphase battery for home backup power, you're actually getting more than just a battery; you're getting an entire energy management system. There are three key pieces of equipment you'll have installed: One or more IQ Batteries store energy.

Are Enphase solar batteries any good?

Enphase is one of the most recognizable names in the solar battery and inverter world, offering three different battery models that are each embedded with their famed microinverters. These batteries -- the IQ Battery 3 and IQ Battery 10 models -- are smaller and much less powerful than options from other manufacturers.

How much storage capacity does a Enphase battery have?

Each of Enphase's three battery options offers a different storage capacity. Here is the usable capacity of each Enphase battery: IQ Battery 3/3T: 3.36 kWh. IQ Battery 5P: 4.96 kWh. IQ Battery 10/10T: 10.08 kWh. While these batteries are a bit on the smaller side, you'll be able to install multiple Enphase batteries to stack additional capacity.

How do Enphase batteries work?

Enphase's batteries are designed to be installed in bundles, creating a modular storage system where capacity and power output stack with each battery installed. This modular design of smaller batteries makes it easier for homeowners to get the capacity size that's "just right" for their home.
