

How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

Is Equatorial Guinea a reversal of fortunes?

It almost marks a reversal of fortunes for Equatorial Guinea, which was once a hotbed of promise when Mobil discovered oil there and Exxon increased production after its takeover in 1999. But oil production has been steadily declining in recent years, down more than 80 per cent from the boom years.

Why did Exxon cut its production in Equatorial Guinea?

Despite Exxon's history of doing business in Equatorial Guinea for almost three decades, the company decided to cut its losses altogether after a safety incident in 2022 decimated its output. That year, water leaked into a production vessel at the Zafiro field, Exxon's main asset in the country, forcing the platform to be retired two months later.

Will China build a naval base in Equatorial Guinea?

There is also a geopolitical balancing act to be navigated. US officials have said China, the country's biggest development partner, has designs on building a naval base in the coastal city of Bata where it has already constructed a commercial port; Washington has warned Equatorial Guinea not to grant that wish.

Chevron has entered into two production sharing contracts (PSC) with GEPetrol for the EG-06 and EG-11 blocks offshore Equatorial Guinea. GEPetrol is Equatorial Guinea's state-owned oil company. The blocks are ...
