

What is a un3480 lithium ion battery?

While UN3480 is the designated tag used to identify lithium ion batteries for shipping, for the purpose of those who are not familiar with the United Nations shipping codes and regulatory tags, the proper name for them are UN3480 lithium ion batteries.

How to ship un3480 lithium ion batteries?

There are regulations put in place for the proper shipping of UN3480 lithium ion batteries as they can be dangerous and hazardous if transported improperly. The transportation methods of lithium-ion batteries include air transportation, water transportation, and land transportation.

What are the packing instructions for un3480 & un3481 batteries?

UN3480 is subject to the packing instructions of PI965, and UN3481 is subject to the packing instructions of PI966 (packaged with the equipment) or PI967 (lithium batteries installed in the equipment). For lithium-ion batteries, the watt-hour rating exceeds 20Wh, and for lithium-ion battery packs, the watt-hour rating exceeds 100Wh.

What is a UN-no 3480 lithium-ion battery?

UN-No: 3480 or 3481 Lithium-Ion Batteries and Lithium-Ion batteries contained in equipment or packed with equipment. ADR Special Provisions 188, 230, 310, 636 will apply and Packing Instruction P903, P903a and P903b. For further information, please visit the UNECE website by clicking [here](#).

Does a lithium battery Mark have a UN number?

Yes. The mark may bear all applicable UN numbers, e.g. UN 3091, UN 3481, to identify that the package contains lithium metal batteries packed with or contained in equipment and lithium ion batteries packed with, or contained in equipment. J. What are the requirements for the telephone number on the lithium battery mark?

What is a watt-hour lithium ion battery?

The Watt-hour (Wh) rating is a measure by which lithium ion batteries are regulated. Section I lithium ion batteries manufactured after 31 December 2011 and Section IB and Section II lithium ion batteries manufactured after 1 January 2009 are required to be marked with the Watt-hour rating on the outside case.

UN3480 refers to a classification for lithium ion batteries that are not contained in or packed with any equipment. This designation is crucial for shipping and handling these batteries, as they are considered dangerous ...

Substance information for UN 3480 - Lithium ion batteries including lithium ion polymer batteries based on

the Hazardous Materials Table (Title 49 CFR 172.101) to assist in preparing a risk ...

Officially, yes: Lithium-ion batteries are governed under the United Nations regulations UN3480 and UN3481 as Class 9 "miscellaneous dangerous goods." Two dangers stand out: First, improperly packaged lithium-ion batteries can lead to short circuits if they come into contact with each other or with other conductive surfaces.

containing the battery. 2.1. Lithium-ion Battery main components. In case of accidental release of the battery content, the operator may be exposed to one or more of the battery constituents. A list of generic constituents of a Lithium-Ion battery is presented below.

So when attempting to ship or transport lithium batteries either for commercial use or in bulk there are certain designations assigned to the batteries, one of which is the UN3480 lithium ion batteries. In this article, we'll be looking at the meaning, designation, methods and regulations involved in shipping UN3480 lithium ion batteries.

category of lithium-ion batteries are lithium polymer batteries. Lithium-ion batteries are generally used to power devices such as mobile telephones, laptop computers, tablets, power tools and e-bikes. Figure 2 - Example of Lithium Ion Cells and Batteries Note: Lithium ion batteries packed by themselves (Packing Instruction 965) (not contained ...
