

Did Eritrea improve its energy capabilities?

Many of the aforementioned developments suggest that Eritrea has improved its energy capabilities. According to government officials, whereas during the initial period of post-independence, the entire power generation within Eritrea was at a feeble 15 mega watts, today it hovers at 200 megawatts.

How much electricity does Eritrea have?

It is also working towards raising the share of electricity generation from renewable energy. According to the 2019 World Bank Global Electrification Database, 50.3 percent of Eritreans have access to electricity, with electrification reaching 75.6 percent and 36.6 percent of the urban and rural population, respectively.

Can Eritrea take a bold leap forward to a sustainable future?

Collectively, there is a chance to take a bold leap forward to a sustainable, inclusive, and resilient future that protects the most vulnerable, with the Sustainable Development Goals as our roadmap. Ms. Sande is the UN Resident Coordinator in Eritrea, while Mr. Wakiaga is the UNDP Resident Representative, Eritrea.

What is Eritrea's energy policy?

First and foremost, the sufficient, reliable and sustainable production and supply of affordable energy throughout Eritrea is the main objective of the Government's policy in the energy sector. The general policy is to provide the energy services based on a diversified supply of energy sources. The specific objectives of this policy are two fold.

What is the energy sector in Eritrea?

The energy sector represents a very substantial portion of Eritrea's national infrastructure development. The recently constructed Hirgigo power plant and grid expansion project that has increased installed electricity generation capacity to 130-200 mega watts at an investment cost of at least \$160 million over about five years.

Why is energy transition important in Eritrea?

Consequently, Eritrea's energy transition should be informed by multidimensional pathways that respond to diverse realities and are critical to sustaining implementation and adaptability. The world is at the tipping point for bolder steps and immediate aggressive actions.
