

To improve Palau's early warning system, a three-day workshop was held on March 22-24, 2023 by the National Emergency Committee (NEC) members. The ultimate objective of the workshop was to outline an EWS ...

It's no secret that the U.S. Indo-Pacific Command plans an air defense system in Guam and radar systems in Palau, as well as space-based radars. While the command is seeking funding for the Pacific Deterrence Initiative in the upcoming 2022 fiscal defense budget, efforts to construct more radar in Palau are moving forward.

Information System Support Services mission is to develop, administer and maintain the central computer system of the Republic to assure its integrity and usefulness and to provide technical ...

On 12 December 2023, Ms. HAGIWARA Mayu, Chargé d'Affaires ad interim of Japan, and Mr. TAKE Yoichi, Representative of Japan Mine Action Service (JMAS) Palau, signed a Grant Contract for "Disposal Works, Technical Transfer and Safety Support for Explosive Remnants of War (ERW) in the Republic of Palau" project.

To improve Palau's early warning system, a three-day workshop was held on March 22-24, 2023 by the National Emergency Committee (NEC) members. The ultimate objective of the workshop was to outline an EWS coordination mechanism, based on an updated National Hazard Profile in the National Disaster Management Framework and the associated ...
