Belize is on a "fast pace" to produce more electric power from renewable sources, as part of a strategy to bolster its energy independence and ensure that everyone in the country has access to electricity.

Belize's leading energy subsectors are looking to expand biomass and small-scale solar, as well as create new opportunities in electric vehicles, large-scale solar, liquefied natural gas (LNG), and waste-to-energy. The GOB is pursuing an initiative to convert sargassum seaweed to electricity and is seeking to promote additional similar projects.

Solar Energy Solutions Belize Ltd., Teakettle Village, Cayo, Belize. 2,162 likes &#183; 18 talking about this &#183; 5 were here. Belize's Top Solar Power Provider for On- and Off-Grid locations!

Almost half the energy in Belize comes from hydroelectric power and biomass. BEL purchases 71.5% of its electricity from five domestic independent power producers (IPPs) which produce much of the remaining energy--about 55.6%--of all the electrical needs of the country, and about 40% from a Mexican

government-owned electric utility.
