

What is Solarstone doing in Estonia?

Solarstone is reinforcing Estonia's commitment to sustainable energy solutions by opening Europe's largest solar roof factory to produce 14 times as many building-integrated solar roofs as Tesla in the U.S. The factory can assemble 13,000 integrated solar panels per month.

Can solar panels be installed on a flat roof in Estonia?

In Estonia, most solar panel installations are installed on pitched roofs. Ideally, the panels should be installed at a 41 degree angle on the south side of the building. If they are installed to the north, the panels will not generate electricity. Alternatively, flat roofs may also be installed with solar panels.

Who is the best Solar Roof Company in Estonia?

May, 2024 Roofit.Solar, an innovative solar roof company, has achieved a historic milestone by becoming the first Estonian business to receive the prestigious "Best of the Best" accolade at the renowned Red Dot Award 2024. 15.

Why should you choose a solar panel system in Estonia?

A solar panel system will save you money on energy, and can also be used as a backup power source during power outages. The Estonian climate is favorable for solar energy production. The country experiences approximately 1600 hours of sunshine a year and the climate is relatively cool.

Why did Solarstone start in Viljandi?

„All three Solarstone founders were either living in Viljandi or had a very close relation to this town, hence the decision was born to also kickstart the business in here and build lasting roofing systems that look pleasant to the naked eye," Silver Aednik, company's managing director and co-founder says.

Who backed Solarstone & Sunly?

Solarstone, which employs 50 people, recently raised EUR10 million (\$10.5 million) in a funding round led by Biofuel OÜ, an Estonian family office investing in renewable technologies. Sunly, an independent energy producer, was an early backer. This content is protected by copyright and may not be reused.
