

With advanced monitoring technology, we provide real-time insights into your system's performance, ensuring optimal efficiency and savings. Whether you're looking to reduce your carbon footprint, lower energy bills, or invest in renewable energy, we have the expertise to help you achieve your goals.

Our solar consultancy and system design services are tailored to meet your unique energy needs. Our team of experts will assess your property, energy consumption patterns, and sustainability goals to design a customized solar solution.

It has evolved to supply power to 22 dispersed rural households via its reticulation network. The project also uses smart metering infrastructure to remotely monitor the plant and household energy usage and allows the implementation of load curtailment.
