

# European energy storage system price ranking

Which energy storage sector has the most energy storage capacity in Europe?

In 2021, residential energy storage accounted for the largest share of cumulative storage capacity in Europe, at 46 percent. Meanwhile, grid-scale energy storage made up a 44 percent share. Nevertheless, the grid-scale segment is forecast to grow considerably in the next decade, to account for over 60 percent of the cumulative capacity in 2031.

Why is energy storage important in Europe?

In Europe, there is a growing consensus amongst policymakers that energy storage is crucial to securing affordable and low carbon energy. In May 2022, European Union launched their REPowerEU plan, a part of the European Green Deal, which mandates that 45% of Europe's energy generation needs to come from renewable sources by 2030.

Is the home storage market growing in Europe?

The market for home storage is growing at a record pace across Europe. For example, in its latest market study for residential energy storage, SolarPower Europe calculates an increase in storage capacity of 71% (3.9 GWh) in the most likely scenario for the past year.

How many energy storage projects are there in Europe?

The database of over 2,600 projects includes detailed data on current installations by customer segment (residential, C&I and front-of-meter) across 24 European countries, future projects and forecasts to 2030. The Market Monitor is based on the most extensive database of European energy storage projects.

What is the growth rate of electrical energy storage in Europe?

The electrical energy storage capacity annually installed grew by 49% between 2016 and 2017 in Europe, which is a steady growth rate since 2015. In 2018 it is expected to grow at a similar rate (45%) with the level of new installations accelerating.

How did the European storage market perform in 2020?

According to the study, newly installed capacity from storage systems in private households rose by 44% in 2020 compared to the previous year. Despite difficult market conditions due to the COVID-19 crisis, approx. 140,000 systems installed saw the European storage market exceed 100,000 installed battery units for the first time.

SolarPower Europe's European Market Outlook for Residential Battery Storage 2021-2025 provides answers to this question. According to the study, newly installed capacity from storage systems in private households
