

Luxembourg is on the right track to reach its objective with its green energy development support project, "Grünrelance für Luxemburg". Renewable energies are still on the rise within the European Union, which has set the goal for green energy to reach 32% of energy usage by 2030.

At Ever-Green Energy our mission is to make a difference each day by developing, owning, and operating efficient energy systems that benefit our customers, employees, communities, owners, and the environment. At the core of what we do is the talent and commitment of our employees.

The Integrated National Energy and Climate Plan (NECP) forms the basis of Luxembourg's climate and energy policy and serves as a roadmap that will be put into practice through the adoption of regulations, programmes and projects in specific areas between 2020 and 2030.

Ever-Green is committed to advancing the sustainability of systems, from conception through implementation. Our 2023 reporting demonstrates the company's dedication to transparency as we act as an ethical, conscientious corporation.

Luxembourg is aiming to exceed the EU-wide goal of 55 percent reduction in carbon emissions by 2030 and net-zero emissions by 2050 and to simultaneously double down on energy affordability and energy supply security.

As part of its National Energy and Climate Plan (PNEC), Luxembourg aims to meet 37% of its national energy consumption through renewable sources by 2030. The current rate stands at 21%....
