

Who is Exergy?

Exergy is an Italian geothermal power specialist that works together with Sulzerto install renewable power generation equipment at sites around the world. Their most recent project was the development of a new facility in Turkey.

Why do we refine oil in Iraq?

We refine 45,000 bp/d of crude oil for the Government of Iraq as per our long term tolling agreement. The product we refine is being used for daily and export needs of the country. We're totally invested in ensuring that we significantly contribute to provide stable and 24 hour electricity to our people.

What happened to the Kurdistan oil refinery?

We acquired a run-down oil refinery in the Kurdistan region and using our expertise we restarted operations and eventually expanded the refinery to 45,000 bp/d capacity by 2012.
