

Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Should the Faroe Islands be self-sufficient?

Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries. SEV operates six hydro power plants, three thermal power plants, three wind farms and one solar power plant.

How many wind farms are there in the Faroe Islands?

Furthermore, external suppliers operate one wind farm and one biomass plant. Total installed capacity in the Faroe Islands is 163 MW and total power generation in 2019 was 386 GWh. Max demand was 63.1 MW in November 2020. In 2018, 49% of power generation came from renewable sources, i.e. hydro and wind power, respectively.

What is a Faroe kite & how does it work?

The technology has been developed by Swedish engineering firm Minesto, founded back in 2007 as a spin-off from the country's plane manufacturer, Saab. The two kites in the Faroe Islands have been contributing energy to Faroe's electricity company SEV, and the islands' national grid, on an experimental basis over the past year.

Will underwater kites help the Faroe Islands achieve net-zero emissions?

Fishing is the primary industry, accounting for more than 90% of all exports. The hope for the underwater kites is that they will help the Faroe Islands achieve its target of net-zero emission energy generation by 2030.

How much seaweed is harvested in the Faroe Islands?

Currently, Ocean Rainforest is harvesting around 200 tonnes of seaweed per annum in the Faroe Islands, but plans to scale this up to 8,000 tonnes by 2025. Production may also be expanded to other areas in Europe and North America. Tidal power generators that look like aircraft are being tested in the sea off the Faroe Islands.

In today's ever-evolving energy landscape, hybrid power systems that combine generators and solar panels have gained significant traction. These systems offer a reliable and sustainable solution for meeting power demands. However, to ensure seamless integration and efficient charging, it is crucial to select the right charge controller. In this blog post, we will delve ...
