Two Dutch Caribbean islands have launched tenders for solar projects. Curaçao's power utility Aquaelectra issued a tender for the construction of a solar project with a capacity of 10 - 15 MW. The utility Saba Electric Company, the provider of power for Saba Island, released a tender for a 1 MW solar park with 1.5 MWh storage system.

Profitability: Wind and solar projects are profitable compared to fossil fuel production. Investment Willingness : Commercial parties and households are willing to finance these projects.

Curaçao has a real solar market driven by savings more than environment but requires financing to make in omnipotent. The Curaçao Water and Electricity company, Aquaelecta, considers themselves a "pioneer in renewables for the Caribbean" with wind and solar projects dating back 20+ years.

We offer full end-to-end solar solutions and complete project management from start to finish. Our services include free site analysis, engineering and design services, financing, rebate application, installation, permitting, inspections, ...
