Why should you choose a solar mounting system for a flat roof?

After all, the roof has lots of usable space and is often large enough for an extra profit-making function. The solar mounting systems for flat roofs from Van der Valk Solar Systems have been developed with all due attention for roof and wind load, so they comply with the highest safety standards.

How do PV flat roof mounting systems work?

The optimal ballasting The PV flat roof mounting systems are fixed to the roof with ballast blocks. Each location requires individual ballasting. Thanks to the optimized aerodynamics of the novotegra systems and the realistic wind tunnel tests carried out from all sides, optimized ballasting is achieved.

What is a novotegra flat roof system?

The solutions enable installation with both south and east-west orientation of the PV systems. novotegra flat roof systems offer optimal mounting solutions for PV systems on flat roofs with all surfaces, including concrete roofs, foil roofs, bitumen roofs and gravel roofs.

Can a solar panel tilt mount be installed on a flat roof?

Build strong and efficient solar arrays on flat roofs. IronRidge Tilt Mount supports a wide range of solar panel tilting angles, while also resisting the extreme wind and snow forces experienced over a building's lifetime.
