

Where is Flin energy located?

Flin Energy has its offices in Mumbai, India and in Virginia, USA. We are focused on setting a new mark in quality of renewable energy solutions by providing cutting edge solar products.

How can I contact Flin solar?

Feel free to call us, send a WhatsApp message or an email. FLIN solar GmbH develops and distributes solar modules and innovative solar systems for boats and yachts. Become independent through solar energy.

Why should you choose Flin solar systems for boats and yachts?

Why FLIN solar systems for boats and yachts deliver top performance. Optimum alignment for maximum performance: The solar modules can be aligned at the perfect angle to the sun. This ensures maximum energy generation through solar radiation, even when the sun is low in the evening.

How many solar modules does a Flin sail have?

The modular solar system consists of two to six solar modules as required, which can be aligned synchronously with the sun. Due to the modular design, we adapt the FLIN sail optimally to your individual energy consumption. Even with two solar modules, the FLIN sail supplies the classic consumers of a 30-foot yacht with sufficient energy.

Where can I find solar systems for sailboats & yachts?

Solar systems for sailboats and yachts. FLIN solar - your expert for high-quality, high-performance solar modules and efficient solutions for a self-sufficient energy supply on board. Discover our innovative solar systems and enjoy freedom on the water. Meet us at the BOOT & FUN BERLIN 2024!

What is a Flin pole + solar panel?

The FLIN pole + is a solar panel that is mounted on the pushpit by means of an aluminum rod. It can be oriented in all directions. Our FLIN stripes are attached to the tarpaulin using Velcro strips. The FLIN flex series offers solar modules of any size with different mounting systems.

FLIN solar - your expert for high-quality, high-performance solar modules and efficient solutions for a self-sufficient energy supply on board. Discover our innovative solar systems and enjoy freedom on the water.

SMART SOLAR SOLUTION. Our home solar solutions use our smart Flin Solar inverters. You can connect the solar panels directly to the inverter. Built-in solar charge controller then lets you generate free power from solar energy! Intelligent system automatically gives priority to solar power over grid power.

We are focused on setting a new mark in quality of renewable energy solutions by providing cutting edge solar products. We train and assist regional renewable energy companies & distributors across the globe to offer

customizable and affordable solar solutions for homes, offices and commercial projects...

FLIN SOLAR INVERTERS. Select By Load Requirements. Below 3kVA. 2.5kVA-5kVA. 3kVA-5kVA. Above 5kVA. Select By Technology. Hybrid without Grid Export. Hybrid with Grid Export. ... Flin Energy, 212 Raheja Plaza Shah Industrial Estate Off New Link Rd., Andheri West Mumbai, MH 400053, India. USA .
