

Vortex Energy IV will target all energy transition verticals, including generation (utility scale solar PV, on/offshore wind, hydropower, biomass, distributed generation), storage, EV charging facilities, as well as supply- and demand-side energy services.

Bahrain currently produces all of its electricity from fossil fuel sources: around 85% of electricity is produced from natural gas, and 15% is produced from oil, with five power stations being used (Figure 1).

What are some initiatives that Vortex Energy has when it comes to contributing to the renewable energy landscape in Europe and the MENA region? Substantial investment in renewable energy is needed to reduce global greenhouse gas emissions to net zero by 2050, especially in emerging markets and developing economies (EMDEs) where they have ...

In this interview, we discuss how Vortex prioritizes its goals in a rapidly evolving market, with a focus on the company's latest projects and initiatives. Tell us about your long-term vision for Vortex and how you prioritize goals.
