

How much electricity does French Polynesia use?

Hydroelectricity accounts for 23% of the electricity mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. Solar water heaters produce hot water using solar energy. In 2019, the electricity consumption saved is approximately 22 GWh, i.e. 3% of electricity consumption.

Is French Polynesia expensive?

French Polynesia is considered to be of moderate price for a vacation destination. Compared to most other countries, the travel costs are average. Prices for food, accommodation, and transportation are all reasonable within French Polynesia, which is known to be an expensive region, but French Polynesia is moderately priced compared to the other countries in the Pacific.

Is biomass a source of electricity in French Polynesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What is energy production in Tahiti?

is the production of electricity of net thermal origin related to the combustion of fuel oil for Tahiti and diesel in the islands. Energies in the electricity mix, thanks in particular to the production of hydroelectricity and electricity from photovoltaic sources.

What is PEC in French Polynesia?

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be compared in relation to their intrinsic characteristics. litres of hydrocarbons were imported in 2019 in French Polynesia. is the dependency rate.

As of 2022, the electricity consumption in French Polynesia predominantly relies on fossil fuels, accounting for over two-thirds or approximately 67% of the total electricity generation. The remaining portion, nearly a third, comes from low-carbon or clean sources.

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be compared in relation to their intrinsic characteristics.

In December 2013 the Assembly of French Polynesia adopted a Law on the Guiding Principles of the Energy Policy of French Polynesia, requiring that a minimum of 50% of electricity be generated from renewable

sources by 2020.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Seasonally adjusted solar panel tilt angles for Papeete, French Polynesia. If you can adjust the tilt angle of your solar PV panels, please refer to the seasonal tilt angles below for optimal solar energy production in Papeete, French Polynesia.

On many of the small islands people have solar panels with batteries which the government helps out with the cost. Example: Raimiti on Fakarava has panels. Costs Our home on Moorea has a average monthly cost that is between 10000 and 13000 CFP per month.

French Polynesia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Our study demonstrates the potential of solar energy in insular regions, such as Tahiti, and highlights the importance of accurate solar energy forecasting for optimizing energy production and...

Below is the average daily output per kW of Solar PV installed for each season, along with the ideal solar panel tilt angles calculated for various locations in French Polynesia. Click on any location for more detailed information.
