

French renewable power producer and developer Akuo has officially opened a 1.2-MW solar park equipped with an integrated energy storage facility on the island of Mayotte in the Indian Ocean.

Mayotte, Albioma exploite un parc photovoltaïque d'une capacité installée de 15,3 MWc. Ses centrales sont toutes implantées dans des zones sans conflit d'usage, comme celle du marché de Mamoudzou qui est, avec ses 725 KW de panneaux solaires, la plus puissante installation en ...

French renewable power producer and developer Akuo has officially opened a 1.2-MW solar park equipped with an integrated energy storage facility on the island of Mayotte in the Indian Ocean. The Hamaha photovoltaic (PV) plant will support the archipelago's goals of adding 60 MW of renewable energy capacity by 2028 to the 25 MW already ...

Mayotte, Albioma exploite un parc photovoltaïque d'une capacité installée de 15,3 MWc. Ses centrales sont toutes implantées dans des zones sans conflit d'usage, comme celle du marché; ...

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Mayotte, Albioma exploite un parc photovoltaïque d'une capacité installée de 15,3 MWc. Ses centrales sont toutes implantées dans des zones sans conflit d'usage, comme celle du marché; de Mamoudzou qui est, avec ses 725 KW ...

Solar energy is the only renewable energy with significant development potential on the island; the wind potential (22 MW according to a study) would not lead to a significant production because the wind blows only 6 months per year.

Mayotte is no doubt the French overseas territory facing the most challenging energy transition. It has the highest cost of electric power generation, at nearly EUR350/MWh in 2021, and the most carbon-intensive production, with fossil fuels accounting for over 95%.

Akuo inaugurated the Hamaha solar plant with storage on Mayotte Island. Built on a former landfill, the project, developed in collaboration with local authorities, repurposes the land for a 30-year decontamination period.

The plant incorporates an energy storage mechanism using Lithium-ion batteries. These batteries enable solar production to be smoothed out and 3.5 MWh - i.e. the electricity produced by the plant in 3 hours - to be stored.

In Mayotte, Albioma operates a photovoltaic fleet with an installed capacity of 15,3 MW. All power plants are sited in locations free from conflicts of use, including the one above Mamoudzou market, which features 725 KW of solar panels, making it the Group's most powerful rooftop plant.
