

The study proposed a model predictive control-based dual-battery energy storage system (DBESS) power dispatching technique for a wind farm (MPC). To explore the DBESS working condition, a state-space model of the active and reactive regulation of the DBESS-connected wind farm was built. The two batteries' control inputs were then acquired by the ...

Georgia Power, the largest electric subsidiary of Southern Company, marked the commercial operation of its first grid-connected battery energy storage system (BESS) on Nov. 7. The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid ...

The project utilizes the GEMS Digital Energy Platform, the company's energy management system, to manage the facility and provide secure operations, and is built with the company's Quantum, a fully ...

Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) earlier this year as part of the company's 2023 Integrated Resource Plan (IRP) Update.

To rid the use of fossil fuels and meet its decarbonizing energy goals, Georgia Power is adding Battery Energy Storage Systems (BESS) to its clean energy portfolio. BESS creates more flexibility with energy usage from ...

Form Energy, a Somerville, Massachusetts-based grid-scale energy storage developer, announced a definitive agreement with Georgia Power, a Southern Company utility, to deploy a 15 MW / 1.5 GWh iron-air battery into the utility's Georgia grid, providing a 100-hour dispatch long-duration energy storage (LDES) system.

Mossy Branch is also the first standalone battery storage asset connected to the Georgia Integrated Transmission System electricity grid. It will charge directly from the grid when power is cheaper, such as during periods of ...

The project utilizes the GEMS Digital Energy Platform, the company's energy management system, to manage the facility and provide secure operations, and is built with the company's Quantum, a fully integrated, modular, and compact energy storage system.

The project utilizes the GEMS Digital Energy Platform, the company's energy management system, to manage the facility and provide secure operations, and is built with the company's Quantum, a fully...

US utility Georgia Power, a subsidiary of Southern Company (NYSE:SO), has brought online its

65-MW/260-MWh Mossy Branch battery energy storage system (BESS), which will improve the resilience of Georgia's electric grid.

Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) earlier this year as part of the company's 2023 Integrated ...

The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid over a four-hour period, adding resiliency to the state's power grid and...

New Battery Energy Storage Projects Underway Across Georgia Georgia Power continues to work with the Georgia PSC to procure and develop BESS projects across Georgia addition to the Mossy Branch facility, Georgia Power is developing the 265 MW McGrau Ford Phase I BESS project in Cherokee County. This project was approved in the ...

Advances in energy storage technology have the potential to positively affect the energy distribution and transmission systems (smart grid), our energy consumption (electric vehicles), make electricity more reliable and available, ...

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC), Georgia legislature, and Talbot and Muscogee counties on Thursday to mark commercial operation of the company's first "grid-connected" ...

The Georgia Public Service Commission (PSC) has signed off on Georgia Power's plans to build 500 megawatts (MW) of battery energy storage across four locations, voting unanimously to certify the utility's Application for Certification on Tuesday.
